SUSTAINABILITY

SUPPORTING OUR CUSTOMERS
SUSTAINABILITY GOALS

Product owners/brands often look for ways to minimize their carbon footprint by evaluating every aspect of their business. One area that offers a great opportunity to reach sustainability targets is by evaluating the manufacturing plants and the process of how the products are produced. A key component of that is the equipment, especially the mold. Mold-Masters equipment and technology supports our customers in reaching their sustainability targets in several significant ways. Sustainability and maximizing productivity to lower part costs goes hand-in-hand. It's something that's been a priority for us for over 50 years.

HOT RUNNERS VS. COLD RUNNERS

Lowering Plastic Consumption

PRODUCT LIGHT WEIGHTING

Lowering Plastic Consumption

ENABLING THE PROCESSING OF NEW SUSTAINABLE MATERIALS

Post Consumer Recycled (PCR) Materials & Bio-Resins

INCREASING ENERGY EFFICIENCY

Lowering Energy Consumption of Equipment

LIFECYCLE MANAGEMENT SERVICE PROGRAMS

Extending the Service Life of Equipment

Bi-Resin

PROCESSING SUSTAINABLE BIO-RESIN AND PCR MATERIALS

Product owners are also looking at ways to make their end products more sustainable. For some, this can mean creating those products from sustainable materials such as compostable Bio-Resins or Post Consumer Recycled (PCR) materials. However, processing these materials can be very challenging compared to the conventional resins they typically aim to replace. This of course can make producing good parts very difficult and sometimes impossible. Mold-Masters is your best partner for sustainable processing solutions.

**“FOR US, MOLD-MASTERS IS MORE THAN A SUPPLIER.
THEY ARE A DEVELOPMENT PARTNER.”**
